

Typhoid conjugate vaccine introduction cost to countries and support from Gavi, the Vaccine Alliance

The World Health Organization recommends TCV introduction for infants and children over 6 months of age as a single dose, and where feasible, a single dose catch-up of children up to 15 years of age.

	ROUTINE IMMUNIZATION				CAMPAIGN		
TARGET POPULATION	 Infants & children older than 6 months ¹				 Up to 15 years old		
VACCINE PRICE PER DOSE	\$1.50				\$1.50		
COST TO COUNTRY							
VACCINE PRICE PER DOSE TO THE COUNTRY	Co-financing based on transition phase						
	<i>Initial self-financing</i>	<i>Preparatory transition</i>	<i>Accelerated transition²</i>	<i>Fully self-financing</i>	\$0 Vaccine procurement fully supported by Gavi		
	\$0.20	Based on country specific price fraction	Based on country specific price fraction	\$1.50			
PAID BY GAVI							
PROGRAMMATIC SUPPORT FROM GAVI	Vaccine Introduction Grant (VIG) Dependent on country transition phase				Operational support for campaigns (Ops) Dependent on country transition phase		
	<i>Initial self-financing</i>	<i>Preparatory transition</i>	<i>Accelerated transition</i>		<i>Initial self-financing</i>	<i>Preparatory transition</i>	<i>Accelerated transition</i>
	\$0.80 per infant in the birth cohort in year of introduction, or a lump sum of US\$100,000, whichever is higher	\$0.70 per infant in the birth cohort in year of introduction, or a lump sum of US\$100,000, whichever is higher	\$0.60 per infant in the birth cohort in year of introduction, or a lump sum of US\$100,000, whichever is higher		\$0.65 per targeted person	\$0.55 per targeted person	\$0.45 per targeted person

¹ Gavi encourages countries to integrate TCV into routine immunization schedules based on the WHO recommendation and national guidelines. Older children may be vaccinated during a routine immunization if earlier vaccination is missed.

² During accelerated transition, the co-financing requirement increases by 20% each year during the 5 year transition period.

All costs are in US dollars.
