

Together We Can

Take on Typhoid Fast Facts

Symptoms:

fever, fatigue, headache, abdominal pain, and diarrhea or constipation

Global burden:

more than **7 million cases** & more than **93,000 deaths**

Ages most affected:

children younger than 15 years old

Treatment:

appropriate antibiotics

Prevention:

safe water, sanitation, hygiene, & vaccines*

* Typhoid conjugate vaccines prevent 79-85% of typhoid cases among children in typhoid-endemic populations in Asia and Africa.
